Do you still have a copy of what they did in 2008?

Which variables have you accepted in the past on other projects?

Seen it used years ago. It was use initially on Seven Hills back 2008ish. Used others. We sometimes accept tracking variables associated with HGM on different project.

The HGM is 14MB not sure if it will go through.

Low Gradient, Riverine Wetland in Western Kentucky

Have either of you used it/are familiar with it?
